

hxm experience day

Modern HR work needs new approaches in order to remain in the market and stand out from the competition. We guide, design and implement your HXM processes with our 360-degree service portfolio – both on-premise and in the cloud. This way, we can optimally support you in your HR transformation.

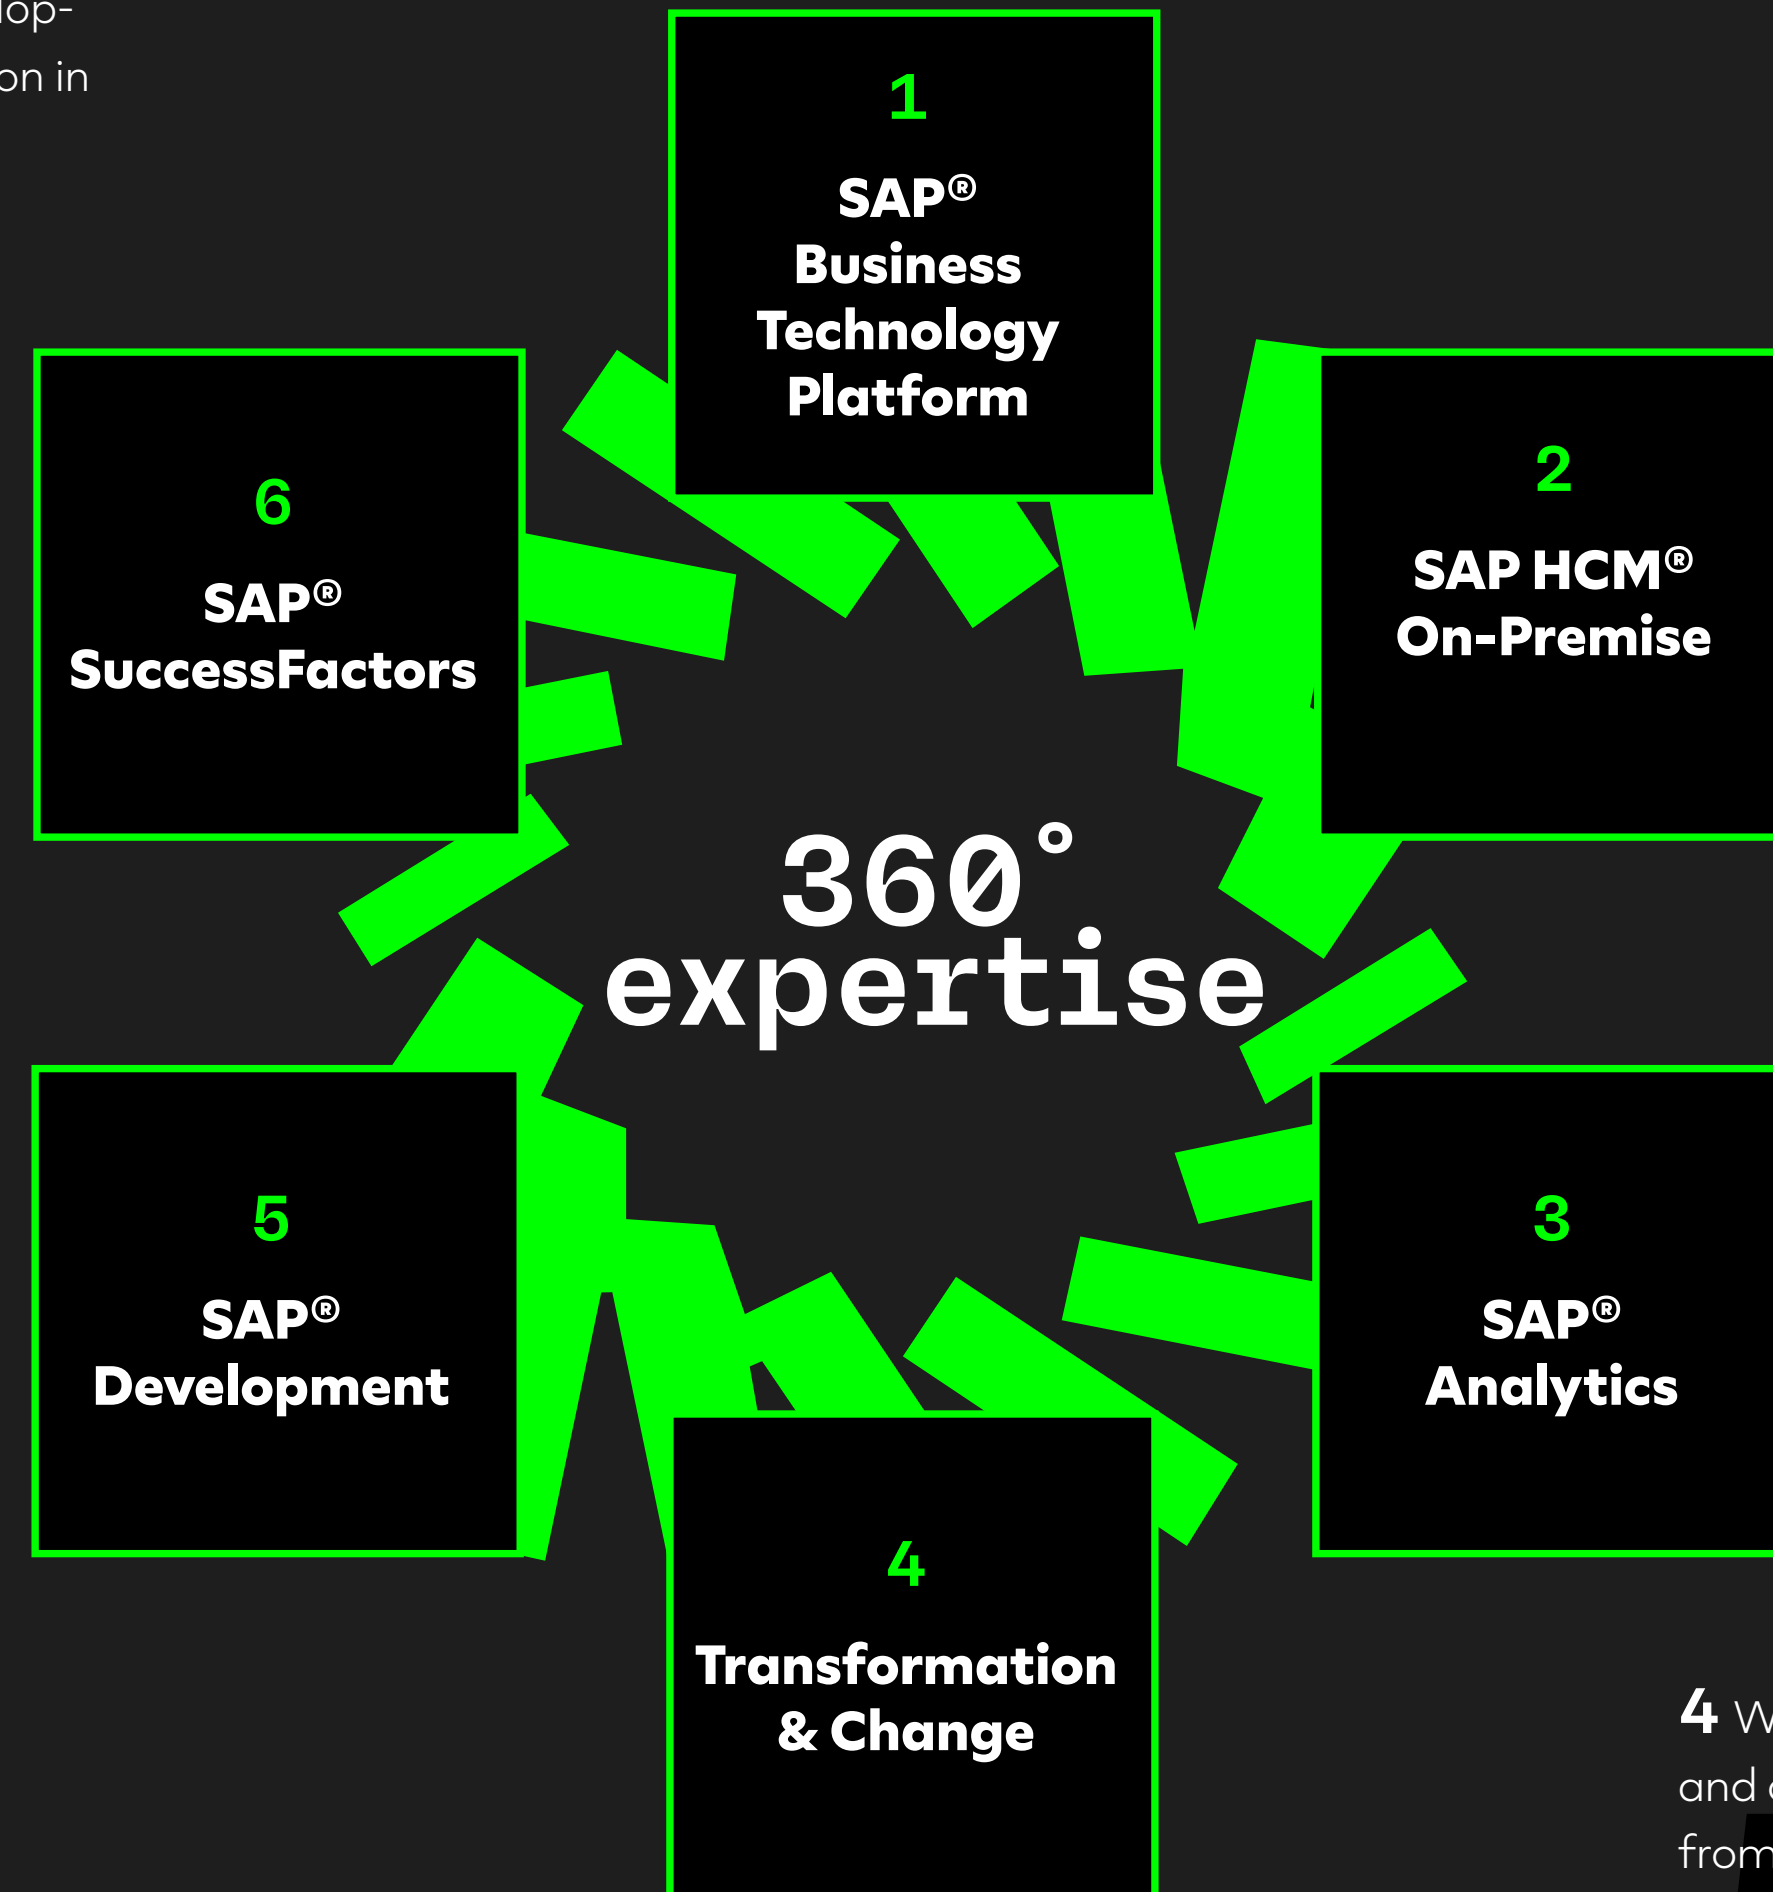

Our unique HXM Experience Day focuses on your company. You determine the topics to be dealt with – the ones that are most relevant to you. This allows us to respond to your individual needs and develop a tailor-made agenda.

1 The SAP® Business Technology Platform is a technology platform optimized for SAP applications in the cloud and combines data and analytics, application development, and automation and integration in a central tool-based environment.

6 The SAP® SuccessFactors HXM suite includes cloud-based solutions for optimizing your HR processes. This includes, for example, a personnel management system for core HR functions as well as payroll, talent management, sales, performance management and people analytics.

5 We adapt your HXM landscape individually to your needs and provide suggestions on how you can innovatively expand the SAP standard and optimize your HR processes. We always attach great importance to the maintainability of your HXM landscape.

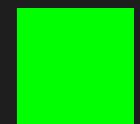

2 We support you in the integration and further development of SAP HCM® systems as well as in the optimization of your HCM processes. In addition, we also offer expertise in the area of application management services and the maintenance of SAP HCM® systems. Already taken your first steps towards the cloud? We can support you in data and process integration for hybrid system landscapes (on-premise and cloud).

3 SAP® People Analytics enables modern HR management based on knowledge. With evidence-based HR management, it's possible to make more information-based decisions that include high uncertainty, dynamics and complexity.

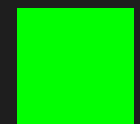

4 We support you in developing new HR approaches and creating effective tools that are designed from the user's point of view. The focus is on the topics of employee recruitment and retention, employer branding, change management, HR process optimization and HR strategy consulting.

design your hxm-experience day

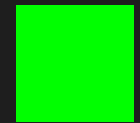

1 SAP® Business Technology Platform

Need seamless integration for cloud systems and in-house on-premise systems?

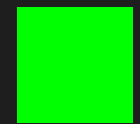

2 SAP HCM® On-Premise

Need help designing your hybrid landscape?

3 SAP® Analytics

Need guidance to correctly and objectively assess the efficiency of internal processes?

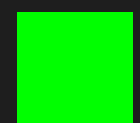

4 Transformation & Change

Want to create enthusiasm for introducing new technical solutions and changes in the company?

5 SAP® Development

Want to adapt your HXM landscape individually to your needs and give it an innovative design?

6 SAP® SuccessFactors

Are you ready for the cloud or want to optimize your cloud-based processes?

Check the topics that are of particular interest to you.
